Summary

Senior Fullstack Developer with 7+ years of experience in developing high-load web applications and microservices architecture. Specialized in the TypeScript stack (React, Next.js, Node.js) and Python (FastAPI). Proven track record in optimizing system performance (up to 30%) and implementing CI/CD processes. Focused on building scalable solutions that deliver measurable business value.

Technical Skills

: TypeScript, Python, Node.js

Frontend: React, Next.js, React Native, Redux, Zustand, Tailwind CSS, Bootstrap, Storybook, SASS, LESS

Backend: Express, Django, Flask, FastAPI, Hono, GraphQL, REST, Microservice Architecture, RabbitMQ, Celery, Kafka

Database & DevOps: MongoDB, PostgreSQL, SQLite, Redis, CI/CD, Bash, Linux, Docker, GitHub, GitLab

Testing & Tools: Jest, Cypress, TDD, Figma, Postman

Experience

Frontend Developer, SKOLKOVO GOLF CLUB – Moscow, RU September 2024 – Present

- Integrated a seamless user dashboard into the existing Next.js website ecosystem.
- Developed client-side features with a focus on performance optimization and code maintainability.
- Designed and implemented an interactive golf course map with complex animations and responsive resizing for all screen sizes.
- Ensured interface stability by identifying and resolving critical bugs in a timely manner.
- Stack: TypeScript, Next.js, Zustand, Module SCSS.

Fullstack Developer, SELIUK LTD – Paphos, Cyprus May 2022 – July 2024

- Developed full-featured web applications using Next.js, Node.js, and GraphQL.
- Architected services and databases, creating scalable RESTful APIs and GraphQL endpoints.
- Built responsive interfaces with Tailwind CSS, ensuring deep integration with backend services.
- Optimized fullstack application performance: implemented Redis caching, optimized SQL queries, and configured frontend code splitting.
- Established a quality-driven culture: conducted code reviews, configured CI/CD pipelines, and improved test coverage.

Backend Developer, ORBI (Stroke Prevention Foundation) – Moscow, RU June 2023 – August 2023

- Developed a scalable system for processing patient medical data.
- Built a microservices architecture using Python 3 and FastAPI.
- Increased data processing efficiency by 30% through deep backend logic optimization.
- Implemented an automated notification system by integrating Flask-Mail and developing APIs for the frontend.

Frontend Developer, Lyubimovka (Non-profit) – Moscow, RU October 2021 – March 2022

- Completed the full development cycle with an emphasis on SEO and Server-Side Rendering (SSR) for improved performance.
- Developed an internal Content Management API and integrated it with a Next.js and TypeScript frontend.
- Ensured service reliability by implementing automated end-to-end tests with Cypress.

Fullstack Developer, JetApps Rus LLC – Moscow, RU

February 2019 – October
2021

- Architected and maintained RESTful APIs on Node.js, ensuring high availability during third-party integrations.
- Optimized build processes by configuring Webpack and implementing UX improvement tools.
- Integrated external services and databases, and implemented real-time functionality via WebSockets.

Fullstack Developer, Freelance / Private Practice

April 2017 – February 2019

- Developed end-to-end projects: from system design and requirements gathering to deployment.
- Created custom solutions using PHP and JavaScript, designed DB schemas, and managed Linux server deployments.
- Provided long-term support and iterative development for launched products.

Education

Yandex Practicum, Python Development Plus – Moscow, RU

February 2022 – August
2023

- **Curriculum:** Python 3, Django, Flask, FastAPI, SQLite, PostgreSQL, CI/CD, Docker, Microservices.

Yandex Practicum, Web Development – Moscow, RU

February 2021 – January
2022

- **Curriculum:** TypeScript, Next.js, React.js, Redux, JavaScript, HTML5, SASS, Express.js, Jest, Node.js, MongoDB, REST API.
